rahoittama**  
NextGenerationEU

# Stellar Q Ltd.

Founded  
**2010**  
in Turku Finland

**100%**  
owned by founders  
and employees

**20**  
employees

# StellarQ Platform

- Multiple Sclerosis
- Myasthenia Gravis
- Movement Disorders
- Epilepsy
- SMA/DMD
- Alzheimer's disease
- Neuromuscular diseases (ALS)
- Migraine
- Neuroimmunology (NMOSD and CIDP)
- Sleep Apnea
- Non-invasive Neuromodulation
- Rehabilitation

CONFIDENTIAL

Current patient information systems

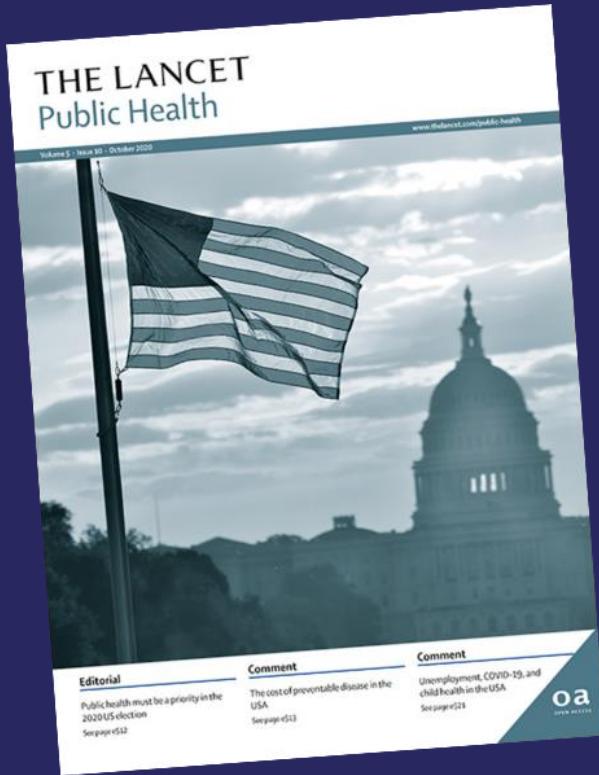

VS

StellarQ platform

The current patient EHR's do not support the monitoring of expensive and demanding long-term illnesses

# The burden of neurological diseases

” Neurological disorders are the third most common cause of disability and premature death in the EU and their prevalence and burden will likely increase with the progressive ageing of the European population. Greater attention to neurological diseases must be paid by health authorities for prevention and care.

## Lancet Public Health 2020

The burden of neurological diseases in Europe: an analysis for the Global Burden of Disease Study 2017

# Visualized example - Sleep Apnea

## Sleep Apnea Suspicion

The screenshot shows a 'Diagnosis' form. The 'Data' section includes a date (2021-11-26) and a diagnosis group ('Sleep apnea & respiratory'). The 'Diagnosis' section lists 'G4.7.3 Sleep apnea'.

## Initial Appointment

## Follow-up Visit

- **Narrative Text**  
Automatic Structured Data Extraction
- **Assessment of Treatment Effectiveness**

## Login

## Preliminary information

The screenshot shows a questionnaire titled 'Sleep apnea patients common questionnaire at first visit'. The question 'Sleep during work day' asks 'How many hours do you sleep during work day?' with a scale from 3 to 10. The user has selected '5'.

## Questionnaires for Patient

The screenshot shows a questionnaire titled 'Device therapy patient's general symptoms Questionnaire phase'. The question 'Have you experienced the following symptoms during ventilator treatment?' lists several symptoms with 'Yes' and 'No' options. The user has checked 'Yes' for 'Morning headaches, which disappears within ½ - 1 hours' and 'Involuntary sleep attacks'.

CONFIDENTIAL

# Collaboration with big pharma

Examples of projects

- Development of clinical Myesthenia Gravis registry together with two companies
- RWD studies like treatment strategies in MS, Cladribine tablets in Finland, the use of MyMS and description of the PROMs
- Invisible symptoms in MS project – development of MyMS to include standardized and validated PROMs
- Remote rehabilitation for fatigue and cognitive problems via MyMS
- Better recognition of active MS by the means of service design
- Long term safety of new DMD as a part of EMA approval process

# Mikä sai yrityksenne hakeutumaan Digi-HTA-prosessiin?

- Painetta asiakkailta
- Puolueeton arvointi StellarQ-järjestelmästä
  - Uskottavuus ja luotettavuus
  - Tietoturva ja tietosuoja
  - Kustannustehokkuus
- Asiakkaille tukea päätöksentekoon

# Digi-HTA-arvointiprosessi

- Hyvät puolet
  - Joustava prosessi
  - Jouhea yhteydenpito
- Kehittäväää
  - Tiedonkeruu: kehittyneemmät työkalut

# Kuinka olette hyödyntäneet tuotteenne Digi-HTA-arviointia esimerkiksi markkinoinnissa tai hankintojen yhteydessä?

- Markkinointimateriaalit
- Myynti / kilpailutukset

# Digi HTA

\*FINCCHTA

” The StellarQ service is suitable for monitoring the treatment of long-term patients. The service can enhance the monitoring of treatment effectiveness.

– FINCCHTA, November 24, 2023

- ✓ Effectiveness
- ✓ Safety
- ✓ Costs

- ✓ Data Security and Privacy
- ✓ Usability and Accessibility

# Mitä lisää Digi-HTA-arviointi on tuonut lisää normaalin hankintaprosessin vaatimuksiin nähdent?

- Perusteellisempi kuin tavanomainen hankintaprosessi

# Oletteko hyödyntäneet Digi-HTA-arviontia tai arvointikriteerejä oman tuotteenne tuotekehityksessä tai näytön hankkimisessa?

- Lääkinnällisen laitteen vaatimukset suurimmaksi osaksi peittävät Digi-HTA arvointikriteerit

# Kiitos!
